Run a Server Virtually

Customer Profile

Andrew Brauda has been in the IT industry professionally since he graduated from Georgia Southern University in 2004. He is responsible for bringing enterprise class IT to a large business who has neglected IT until this point. Lewis and Raulerson sells petroleum-based products hydraulic fluids, lubricating oil, greases, motor fuel and fleet fueling services.

The Challenge

Lewis and Raluerson had been using Symantec Backup Exec in the past. They told us that they did not like it as it was cumbersome and not intuitive to operate.

The Solution

Lewis and Raulerson chose Unitrends Recovery-712 On- & Off-Premise Appliance. It offered them an easier interface, standalone appliance, and gave them the ability to run a "VM" on the appliance if they have a catastrophic failure.

The Results

The company had a primary file server which had a backplane failure taking the boot drives down. They had just ordered new hardware to implement VMware but had not configured it all yet. Overnight, the Systems Engineer and Brauda built out an entire VMware Essentials Plus 6.0 ESXi environment with EMC storage, and they used Unitrends to recover the file server from an incremental backup from the previous night using a bare metal restore. They created an image to use as a virtual machine, and brought it into the new VMware environment. They started it up with zero errors and all data was live.

About Unitrends

Unitrends is trusted by IT Leaders and Pros who know that in today's digital world protecting their ideas and keeping their business running is non-negotiable. To address the growing volume and value of digital information, the company's award winning portfolio of Continuity Solutions enables customers to capitalize on cloud economics, reduce their overall spend on IT, and have 100% confidence in the recovery point to come. Unitrends' Continuity Solutions are backed by a customer support team that consistently achieves a 98% satisfaction rating and are sold through a community of thousands of expert technology partners, service providers and resellers worldwide.
